Elastic Fire and Water Proof CEMENT ROOFING. THE undersigned purchased the State Right for Tennessee of the above patent about one year ago and has since introduced it extensively in various

ortions of the State, asks now the attention of build ers, and the public generally, to examine its superiority over other modes of Roeling.

The material forms a hard and smooth surface. It s impervious to water, elastic and flexible; it will perfectly resist any ordinary exposure to fire, it is cheaper than any roof of the old style, and I am sure it will give better satisfaction; as to its durability there is no question. It is the best thing over invented for painting of old leaky tin roofs.
